Re: 4G-5G deployment liabilities

Dear Sen./Rep. \_\_\_\_\_:

You are my elected representative. I am a professional / expert in \_\_\_\_\_.

This legal notice of liability is designed to be used as evidence in court, if needed, and intends to enlighten and protect you from attracting civil and criminal liabilities in relation to your actions and omissions pertaining to the deployment of 5G infrastructure within your jurisdiction.

4G-LTE small cells are part of the 5G deployment. Such infrastructure, if operated, would cause me to be exposed to pulse-modulated microwave radiation against my consent within my municipality, my home and my body.

Contamination of my home with 4G-5G radiation would cause damage to my home, since it would harm my health and render my home uninhabitable. Irradiating me with pulse-modulated microwave radiation against my consent would be an application of force against my person and bodily injury, and could be classed as a civil trespass and criminal assault.

Any level of exposure of man-made microwave radiation can be diagnosed by my medical practitioner as an adverse health effect pursuant to the WHO's International Classification of Diseases ICD-10, Code W90. Any government guidelines (set under conditions of scientific fraud in 1991) are inapplicable as to protecting my health and environment, since such guidelines only applied to six (6) minutes' exposure.

If 5G infrastructures are deployed within your constituency, I expect and require that you, my elected representative, exercise due diligence to certify that all parties deploying 5G have sufficient insurance coverage to compensate for damages and harm caused by pulse-modulate microwave radiation transmissions. Please note that underwriters such as Lloyds of London do not insure for such harm and damage.

I urge you, my elected official, to act in the public interest by 1) publicly addressing through a scientific forum on the immediate, short-term, and cumulative human and environmental effects of densification – the crowding of “small” but powerfully irradiating cells into a limited area for 5G; 2) writing to the public regulatory authorities – without limitation EPA and FDA – to insist that they act on the scientific knowledge of this hazard; and 3) ordering the cessation of deployment of 5G and its related activities, named “Artificial Intelligence” (AI), the Internet of Things (IoT) and Internet of Bodies (IoB), to ensure that the national security and the safety and privacy of the public, the environment, and myself are not compromised.

You are authorized and required to protect the public from other harmful deployments of radiofrequency/microwave (RF/MW) radiation such as Wi-Fi in schools, “SMART” utility meters and the like, and to replace these with safe and efficient wired options, such as fiber-optic cables - already paid for contractually by wired customers, by force and without consent - and Ethernet, as the end-nodes of internet delivery systems to dwellings, schools and commercial buildings. Forward-thinking cities are already moving toward fiber, and much fiber is already laid across the US, ready to be “lit”.

I implore you, my elected official, to act in the public interest and protect the public and myself from being persecuted and targeted by the passage of laws that restrict the Courts, law enforcement agencies, state and local governances and instrumentalities thereof, from taking action to protect men, women and children; birds, bees and other wildlife; and plantlife, from harm caused by 5G and other wireless deployments. The many current bills mislabeled “broadband” contain outrageous deregulatory provisions in violation of other laws and constitutions.

As a human being, I genuinely care for your welfare, the general public and mine. Having studied the relevant facts and laws, I am well aware of the danger and know it is in your interest likewise to be fully informed. Please read [Scientists4WiredTech.com](http://Scientists4WiredTech.com) and [Zero5G.com](http://Zero5G.com), where you will find peer-reviewed studies that are admissible per the Supreme Court Daubert Rule. Note: this is no mere matter of "concern" or "fear" or any other nonsubstantive matter, but rather of fact and law, and I hereby object to any attempt to mischaracterize this communication as nonsubstantive.

The 5G imposition constitutes a national emergency and a Constitutional one. As an elected official, you may be liable if you do not take appropriate actions to cease the 4G-LTE – 5G rollout and prevent widespread harm, including to myself. I implore you to take leadership and be a champion for the health and safety of all of us, and for the survival of Life on Earth.

Signed this \_\_\_\_\_th day of
