

Protect Families, Communities, Nature from 4G-5G microwave irradiating WTFs!

Wireless Telecommunications Facilities = WTFs

Goal: STOP AS MANY WTFs AS POSSIBLE

Steps:

- 1) Visit local Planning Board / Commission Office - Go with one other person. Take non-phone camera and snacks in case it takes a while to find the paperwork. Be professional and polite.**
 - a) Inspect telecom file for applications and permits**
 - b) Take a photograph of each document in the file - this may take 1-2h.**
 - c) If they refuse you or tell you you have to make a Sunshine Act request for copies, or that you should just look at the documents in e-form, you correct them that you have a right to INSPECT the public record, on the spot.**

- 2) See where there are:**
 - a) permits without complete applications and challenge them as incomplete so that construction cannot take place**
 - b) constructed WTFs without complete applications and therefore improper permits and challenge to require operations cessation and removal**
 - c) applications that are incomplete, deficient, errant, incoherent, etc. and challenge them**
 - d) constructed WTFs with apparently complete applications and apparently proper permits, where the radiation deployment differs from the frequency or other specs contracted in the permit.**

- 3) Get the Municipality/County Compliance Officer, Enforcement Officer, City Manager or whoever it is that deals with compliance to get illegal operations stopped immediately.**

- 4) Submit Formal Cease & Desist Letter to Local Planning Commission, modified for applicability to the local situation.**

- 5) Get people to present, with substantiation, PRE-VETTED, WRITTEN TESTIMONIES THAT ARE ACTUAL AFFIDAVITS WITH JURATS, ENTIRELY OBJECTIVE (NO "CONCERNS" OR OTHER NONSUBSTANTIVE MATTERS) REFERRING TO OFFICIALS' OATHS OF OFFICE.**

NOTE: Many other possibilities may come up along the way: the above is just one possible path.
